Professional Profile

Junior Pentester focused on offensive cybersecurity, eJPT certified (INE Security) and a background in computational mathematics and programming. I have professional experience in the systematic detection, reproduction, and documentation of technical faults. My practice focuses on reconnaissance and enumeration, web security, exploitation, and privilege escalation within Linux and Windows environments. I am currently seeking my first professional pentesting role while maintaining an interest in junior defensive security positions.

Certifications

eJPT: eLearnSecurity / INE Security *Junior Penetration Tester*

Technical Skills

Pentesting: Reconnaissance and enumeration, vulnerability identification and exploitation, initial access, privilege escalation

Web security: HTTP enumeration, authentication testing, SQL injection, SSTI, file upload

Systems and networking: Linux, Windows, TCP/IP, routing and pivoting

Scripting: Bash and Python

Tools: Nmap · Burp Suite · Gobuster · John/Hashcat · CrackMapExec · Impacket · Metasploit Framework

Experience

Test Driver May 2026 - July 2026

AES/DLS Group

Systematic detection, reproduction, and documentation of technical faults during vehicle testing, with reporting adapted to both technical and non-technical audiences.

Technician April 2025 - February 2026

Costa Moya l'Olivera

Execution of technical field work and maintenance of equipment.

Exam Invigilator May 2023 - September 2024

University of Cambridge

Identity verification, supervision of the exam procedure and incident handling according to protocol.

Logistics Operator September 2023 - January 2024

Kuehne+Nagel

Goods management and operational coordination in an international warehouse environment, entirely in English.

Education

Computational Mathematics Degree (not completed)

Universitat Autònoma de Barcelona (UAB)

Coursework in programming, logic and mathematics
